BIOLOGY AND EARLY DETECTION OF THE EMERALD ASH BORER

Learn More About incipient populations of this pest

This is a FREE seminar but space is limited. Please register in advance

Idaho Department of Lands will be sponsoring this seminar, Biology and Early Detection of the Emerald Ash Borer on **Wednesday, September 28th from 1:00 to 3:00 pm** at the Idaho Department of Lands Coeur d'Alene Staff Office. This Presentation will be given by Jeff Fidgen with Natural Resources Canada, formerly IDL's Forest Health Program Manager.

The presentation will cover developing **diagnostic skills** and discussing **early detection tools** for emerald ash borer, with special reference to a branch sampling technique to confirm incipient populations of this pest.

Location: Idaho Department of Lands
Coeur d'Alene Staff Office
3284 West Industrial Loop
Coeur d'Alene Idaho 83815
Sundance Conference Room

Date: September 28th
Time: 1:00pm - 3:00pm

About Urban Forestry

City of Spokane Urban Forestry staff manages 50,000 street trees and another 28,000 trees on developed park land within the City of Spokane. City arborists help manage the urban forest by planting and maintaining trees throughout the City. The thinning of trees in some areas is also done to improve the overall health of various stands of trees in the City's park system. Improving the City's urban forest is an ongoing project that will take decades of work and careful management. In 2010 Spokane received its seventh year in a row designation as a Tree City USA. That program is sponsored by The National Arbor Day Foundation in cooperation with the USDA Forest Service and the National Association of State Foresters. For more information please call 509.363.5470 or go online to www.spokaneurbanforestry.org
