

Mirror Pond Renovation

Phase 1—Water Quality

- Add emergent plants and other shoreline vegetation
- Pump and equipment to add dissolved oxygen to the water and a water level control device.
- Water savings accomplished by recycling pond water and shutting down city water when evaporated water is replaced.
- Improves the health and clarity of the water
- Improves the aquatic and wildlife habitat
- Goal is \$320,000

Phase 2—Shoreline Renovation

- Stabilize pond edge
- Create a paved path loop
- Improves the aesthetics of the landscape

Phase 3—North Water Feature

Phase 4—South Water Feature
